

1 (April 3, 2006)  
2 Measurement of high-tension cable barrier will be by the linear foot along the line of  
3 the completed barrier from end to end including transition sections, terminals, cable  
4 barrier to guardrail terminals, foundations, sockets, concrete, compensating  
5 devices, tensioning device, slip base post, sleeves, caps, and all hardware.  
6  
7 No specific unit of measurement will apply to the lump sum item "Additional High-  
8 Tension Cable Barrier Components". The lump sum measurement will include all of  
9 the items furnished and delivered to the maintenance yard.
